

string

strstream

str2str.h

```
graph BT; str2str_h[str2str.h] --> string[string]; str2str_h --> strstream[strstream];
```

The diagram illustrates a dependency or inheritance relationship. At the bottom, a black box labeled 'str2str.h' has two blue arrows pointing upwards. One arrow points to a box labeled 'string' on the left, and the other points to a box labeled 'strstream' on the right. This suggests that 'str2str.h' provides a common interface or base for both 'string' and 'strstream'.
